DETAILED ACTION

Priority

It is noted that this application claims subject matter disclosed in prior Application No. 08/869,237, filed June 4, 1997. The reference to this prior application is found as the first sentence of the specification of this application. However, the current status of all nonprovisional parent applications referenced should be included. The parent application is now a U.S. Pat. (6,306,826), issued 23 October 2001. An amendment to the specification should be made to include this information.

Response to Amendment

Claims 1-16 have been canceled and claims 17-37 have been added. Claims 17-37 are currently pending and under examination in the instant Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17-29, 31-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 and 24 recite "administering a growth hormone", however, the metes and bounds of "a growth hormone" cannot be determined from the claims. "A growth hormone" implies the administration of any hormone that affects growth of cells, which

Art Unit: 1647

claims to a method of treating heart failure after MI by administration of angiotensin II receptor inhibitor, followed by administration of growth hormone. The patented claims recite specific dosages (or dosage ranges) as well as time periods for the administration of the two compounds. The instant claims do not recite specific dosages or time periods, but these dosages and time periods could be determined from the prior art of record and from the disclosure of the issued patent (similar method in the art, which utilizes ACE inhibitor – instant method distinguishes by the use of ATII-receptor inhibitor). Therefore, the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent. The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter as indicated above.

Conclusion

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine J. Saoud whose telephone number is 703-305-7519. The examiner can normally be reached on mttr, 8:00-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz can be reached on 703-308-4623. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
